I. AUTHORITY

Authority: Idaho Code § 67-5745 (A) (B) (C),
H.R. 3403: New and Emerging Technologies 911 Improvement Act of 2008 or the NET
911 Improvement Act of 2008

II. ABSTRACT

General expectations are that 911 should work consistently and enable emergency responders to quickly reach the right location. It is critically important to ensure that State telecommunication systems meet these expectations for the safety of our employees and visitors to State facilities.

It is important to understand that Multi-Line Telephone Systems (MLTS), such as VoIP (Voice over Internet Protocol), PBX (Private Branch Exchange) or Key Telephone Systems, can present challenges and limitations in terms of the ability to provide detailed location information to Public Safety Answering Points (PSAP's) in times of emergency.

Most State office locations have MLTS provisioned with several, possibly even hundreds, of telephone numbers. In addition, a State office may consist of a large office building with several floors, or several buildings within a campus environment and in many cases using VoIP technology a single MLTS may service multiple addresses spanning multiple PSAP jurisdictions. Therefore, the planning, coordination and routing of 911 calls placed from a State MLTS can be quite complex.

III. DEFINITIONS

There are no definitions for this policy.

IV. POLICY

At a minimum agencies must ensure: they provide the ability to direct dial 911 from anywhere on their MLTS; that all 911 calls originating from one of their MLTS installations routes to the appropriate PSAP; and that the correct response location is delivered to the PSAP. State agencies must include 911 accommodations when planning and deploying any MLTS (VoIP, PBX or Key telephone system).

V. EXEMPTION PROCESS

Refer to [Policy 1010 – Information Technology Policies, Standards, and Guidelines Framework](#).

VI. PROCEDURE REFERENCE

There are no procedure references for this policy.

VII. CONTACT INFORMATION

For more information, contact the ITA Staff at (208) 332-1845.

VIII. INTENT

1. Ensure the safety of State employees and visitors to State facilities
2. Preparation and planning for future installations and integrations
3. Meet FCC requirements for VoIP service providers

REVISION HISTORY

07/01/13 – Changed “ITRMC” to “ITA”.

6/16/09 – Added Definitions, Exemptions Process, Procedure Reference and Revision History to this policy, changed the layout and deleted Timeline.

Date Established: October 22, 2008
